EDUCATION

Bachelor of Engineering in CSE(Iot,CyberSecurity & Blockchain Technology) Lokmanya Tilak College of Engineering	Dec 2021 - Present CGPA: 7.90*
HSC Maharashtra Board SMT. Chandibhai Himathmal Mansukhani College	May 2021 72.50%
SSC Maharashtra Board Pet Ox Ford High School	May 2019 75.60%

PROJECTS

- Arise** | NodeJS, ExpressJS, ReactJS, MongoDB, WebSockets, Redux, JWT | **Team Project**  
- Arise is a productivity app that helps users overcome **procrastination** through **real-time** collaboration, **task management**, and **gamification**.
 - Real-time updates**, **task management** with a progress bar, **point system**, **leaderboards**, **real-time chat**, and **room** features (**create**, **join**, **leave**, **delete**).
 - Faced an **issue** with **WebSocket** states in room **resetting** after a **refresh** and **resolved** it by implementing **Redux** for persistent state management.
- TrustVibes** | Firebase, ReactJS, Tailwind Css | **Team Project**  
- Trust Vibes is a platform that enables **small website owners** to **collect**, **manage**, and **display testimonials** as shareable **iframes**.
 - User **dashboard** for managing **reviews** and **spaces**, **creation** of custom review **forms**, functionality to **create** and **delete** testimonial spaces, conversion of **testimonial** cards into embeddable **iframes**.
 - Faced the **challenge** of simplifying the **iframe generation** process for **non-technical users** and **solved** it by automating the process with a **user-friendly** interface in React.
- GitTimeline** | VSCode API, Typescript, Gemini API, Octokit | **Team Project**  
- GitTimeline is a **VS Code extension** that automates **real-time code tracking** by committing changes to a Git **repository** after every **save**.
 - Automatic **repository creation** using the GitHub API, **real-time commits** to a dedicated code-tracking branch, tracking **current** and **previous** work contexts for **comprehensive logging**.
 - Faced with the **challenge** of generating precise **commit messages**, I integrated **Gemini** to analyze code and generate meaningful, **accurate commit messages automatically**.

EXPERIENCE

- Development for a Jamaican Sign Language translation website** | Upwork Sep 2023 - Oct 2023
- * Developed a **sign language website** using **HTML**, **CSS**, and **JavaScript**, enabling users to learn sign language through an **interactive interface**.
 - Search functionality** for word input, **displays each letter** as a corresponding **sign language image**, timed intervals between image displays, **user-friendly** and accessible interface, **responsive design** for compatibility across devices.

POSITIONS OF RESPONSIBILITY

- Web Developer** | Upwork
- Development for a Jamaican **Sign Language translation** website.

TECHNICAL SKILLS

Professional Certifications: Responsive Web Design , Javascript Algorithms and Data Structures 

Languages: HTML, CSS, JavaScript, Typescript, Java

Tools/Frameworks: Git, GitHub, NodeJS, ReactJS, Digital Ocean, Firebase, Docker, ExpressJS, MongoDB, Socket.IO

Courses: Database Management, Data Structures, Algorithms, Networking, Web Technology, Cloud Computing,
